LEPE, EXBURY AND THE MOUTH OF THE BEAULIEU RIVER IN 1811

A modified version of an old map showing the extensive mud flats around the mouth of the Beaulieu River. Note the saltens near Lower Exbury and near Warren Farm. There is not only Stone Farm and Stone Point shown but also Three Stones Farm. The problem of the "Stone" names is not understood. What were the stones? Were these sarsen stones? Are any preserved now? Notice the early state of development of the Needs Oar Point area that later acquired an extensive shingle spit and marshes. The Solent Brick Works are not shown at this date. Particularly note that the Dark Water mouth was deflected east at Lepe and originally discharged at the present site of the car park. (Jan West, 2009).
